W70-22 = Wrattenbullie 70-2022

GD436-22 = Glen Devon 436-22

N148-22 = Newbold 148-2022

GD15-23 = Glen Devon 15-2023

LAMBPLAN ASBVs

Lambplan breeding values provide some useful information in conjunction with a visual appraisal of the sheep. The market you are targeting will provide a good starting point for the ASBVs

Weight (Pwwt)- Provides a breeding value for growth rate. A more positive value for Pwwt indicates a faster growing animal.

Fat (Pfat) - provides a breeding value for leanness. A more negative value indicates a leaner animal

Muscle (Pemd) - provides a breeding value for muscling. A more positive value indicates an animal with higher muscle depth and potentially yield.

The Carcase Plus index has now been replaced by the **Terminal Carcase Production Index (TCP)**. This will be the only index in the catalogue to keep things simple.

The TCP index has been created to help producers achieve gains in production traits such as post weaning weight and muscling, as well as ensuring consumer satisfaction from lamb is maintained through focusing on eating quality traits such as shear force (tenderness) and intramuscular fat (marbling).

The TCP index combines Pwwt, fat, emd, dressing %, lean meat yield, intramuscular fat and shear force into a dollar index value expressed as dollars/ewe joined /year.

All lambplan data from August 15, 2025 run.

Further lambplan information available by request.
